**THIRD INFORMATION DISCLOSURE STATEMENT (IDS)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 CFR 1.56, 1.97 and 1.98 and supplementing the two prior IDS documents submitted at filing and on December 1, 2005, the Applicant, through its representatives and attorneys, hereby brings to the attention of the Patent and Trademark Office the additional information listed on the attached Form PTO-1449. Copies are provided. This submission is timely in that it is made prior to a first action on the merits of this application. It is respectfully requested that the information be expressly considered during the prosecution of this application, and that the references be made of record therein and appear among the "References Cited" on any patent to issue therefrom.

This will also certify that each item of information contained in this Third Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this statement. Specifically, these documents were noted in a Search and Written Opinion of the Australian Patent Office in connection with a corresponding SG Application dated December 112, 2005. A copy of those papers is here provided.

Document D1 in the SG report, US 2003/0021298 was cited as document AA in the IDS of December 1, 2005. Document D2 in the SG report, US 5854873 was cited as document AA in the IDS at filing. Thus, neither of these documents in duplicatively provided. However, although JP 11-110915 was cited as document BB in the IDS as filed, it appears that a machine translation was provided with the SG search report. Thus, it is submitted for its machine translation.

Please take the documents and information cited in these three Information Disclosure Statements into account, along with the information in the application as filed in the Background of the Invention, and make their consideration of record.

Dated:

2/3/06

Respectfully submitted,

By

Ronald P. Kananen
